

HTTP e HTTPS

Redes de Computadores

Aula 15/40

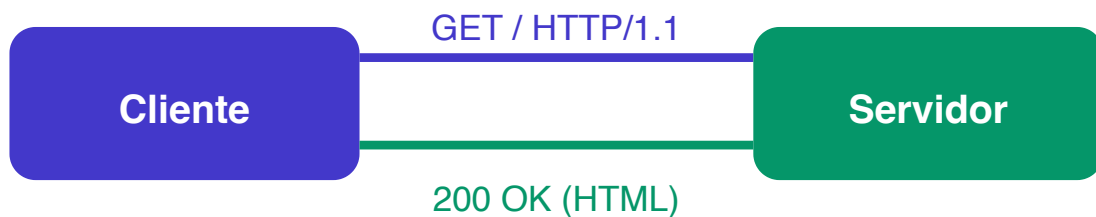

Ip

Http

Udp

📖 Conceito

HTTP (RFC 7231): GET/POST/PUT/DELETE. Cabecalhos: Content-Type, User-Agent, Cookie, Authorization. Status: 2xx (200 OK), 3xx (redirect), 4xx (404), 5xx (500). HTTPS: HTTP over TLS, certificados X.509, porta 443. HTTP/2: multiplexacao, HPACK. HTTP/3: sobre QUIC/UDP.

HTTP sem criptografia

HTTPS com TLS

Atividade Prática

`curl -v http://example.com` requisicao completa. `curl -v https://google.com` TLS handshake. Compare.

Pesquisa

Pesquise TLS 1.3 handshake: Client Hello, Server Hello (certificado), Key Exchange (ECDHE), Finished.
2 viagens vs 4 do TLS 1.2.

Requisitos

Acesso ao terminal. Comando: `curl`.
